Chlorine Dioxide (Clo<sub>2</sub>) - Electrically Expanded Water (Ex W) - Hydrogen Gas - Hypochlorous Acid - Dimethyl Sulfoxide (DMSO)

Topic: **Treating Herpes & HIV & Aids with Chlorine Dioxide**

Edition 2022.x

## HOW CLO<sub>2</sub> STOPS Herpes, HIV & Aids?

Herpes (also known as the Herpes Simplex Virus) is a viral infection that causes sores on the genitals and sometimes on the mouth.

Human Immunodeficiency Virus (HIV) is the virus that causes AIDS (Acquired immune deficiency Syndrome) but they are not the exact same thing. Another way to look at it is to say that you can get HIV which can turn to AIDS in its latter stages. With HIV, the body's immune system is attacked and where the infected individuals experience things like fever, chills, rashes, night sweats, aches, sore throat, fatigue, weight loss, diarrhea, yeast infections, shingles and pneumonia and more.

In the cases with Herpes, HIV and AIDS, these are generally considered to be spread through the exchanging of bodily fluids and/or sexual contact, which is why they are called **Sexually Transmitted Diseases**.

Herpes, HIV and Aids are

considered by Western Medicine to be incurable. However, after decades of saying this, there are claims that [treatments are becoming available in the past year or so](#). Although these treatments are still being tested, they are still new and are probably not inexpensive.

As Herpes, HIV and Aids relate to Chlorine Dioxide, it is simple to note that these 3 infections are viral or virally related. This means that they can be successfully destroyed with the virus-killing capabilities of Clo<sub>2</sub>. **CHLORINE DIOXIDE IS A SAFE VIRUS KILLER** as long as the dosages are correctly measured and taken. (See the research articles at the end of this document to learn more about what modern medicine hasn't been teaching about "virus killers")

**With Herpes, the simple [Protocol 1000](#), with MMS is the common treatment.**

If you are using the CDS version of Clo<sub>2</sub>, [Protocol C](#) is the method to eradicate it. It may require more than one round of the 3-week protocols to

eliminate the infection symptoms but it will work over time. (Example: Protocol 1000, maintenance dosage for several weeks. Then, another round of Protocol 1000. Repeat the cycle until symptoms are gone).

**With HIV/AIDS**, there are two different, yet intensive, methods for treating them. One optional regimen is the [Protocol 2000 \(using MMS\)](#), which uses a mix of Chlorine Dioxide AND Hypochlorous Acid (which comes from calcium hypochlorite tablets). I believe that this protocol can be made with the CDS-Protocol C and the same hypochlorous acid but it would need to be slightly modified. (Protocol C is a 10x/day dosage whereas the Protocol 1000 is an 8x/day dosage).

**The other option with the HIV/AIDS treatment is with the Protocol 3000 (with MMS)**, which includes topical skin applications with the spray bottle method using Clo<sub>2</sub>. Again, this protocol can be done with CDS using Protocol [C and Protocol D](#).

## TESTIMONIALS

(Unedited with Initials):

# HERPES

**(Claudio)**

IT CURED MY ORAL **HERPES** IN THREE WEEKS, AFTER SUFFERING WITH IT FOR ALMOST 20 YEARS...IT ALSO CURE SOME WARTS THAT MY DOG HAD IN HIS EYE. IT WORKS, IT CURES AND IT IS CHEAP, THAT'S WHY THE BAD PROPAGANDA.

**(Ceasar)**

I got cure with MMS, **herpes** gone, and my asthma as well. Never had a cold or sore throat, Big pharma don't want people to know that, so they can't make money with that.

**(Ginalepa)**

I have been using it and it's wonderful stuff.... this is a miracle...it's hard to find to buy.... but guys this is a something everyone should have it.... I had huge **herpes** zoster on my cheek ... within a Few days everything was gonna.... usually this size of **herpes** takes at least 2 to 3 weeks to clear up.... I bought even the books... originally from Jim Humble.... guys this is really miracle solution

**(Perk)**

I gave it to someone for **Herpes** and it cured them...ijs I also gave to another person who had an abscess, it fixed the abscess in 3 days!

**(Dave)**

I've lived with **herpes** for 33 years. In that time I learned a lot about it, enough to know the difficulty in trying to cure it. Mainly, when inactive, the virus manages to hide out in the nerve ganglion at the base of our spines, so eludes our bodies efforts to find and kill it. When I read about adding DMSO to MMS (hence protocol 1000+) I was intrigued as the DMSO is apparently capable of carrying the ClO<sub>2</sub> into places it otherwise can not reach. **Herpes** is also a fragile virus, and a parasite. That means it cannot survive outside of a living cell, and just about anything it comes in contact with will kill it. It stands to reason that, if the MMS can reach it's hiding place, it could seemingly kill it off for good. It took a little while to get there, but I managed to slowly work my way up to full strength (3 drops every hour for 8 hours per day) with MMS. I did not add the DMSO at first, but once I was at full strength for a bit, I started adding it. I used a

kitchen timer for my reminder, and did not miss a single dose for the full 21 days. In fact, most days I took an extra dose at the end of the 8 hours, so many days I took a 9th dose (27 drops per day). That was more than 2 years ago, and there has not been any signs or symptoms of **herpes** since. I survived a sunburn last summer, which was a nearly certain trigger for me before. I've also been eating lots of nuts and taking protein powder that is high in argenine and still no signs or symptoms at all. I may never know for sure if this worked. If I ever do have another outbreak, I will know it did not work. If that ever happens, I will come back to this site and update this testimonial if possible. The MMS did a few other things for me that I do know for sure. It cured conjunctivitis which I'd had since I was a child, and is now completely gone. I'd also started having some difficulties with frequent urination, and that is completely gone and back to normal. I also saw some improvement with arthritis that has formed in my big toe, and improvement in an old injury to my knee. There is no doubt that MMS is responsible for helping and curing these other things in me. Since there is no known test for the virus itself, only time and results will tell if this works for

**herpes.** So far, it seems to have worked for me.

21 Apr 2017 21:22 Post #55484I promised to return to this site and update this testimonial if I ever did have another outbreak. I am sorry to report that after 3 years of using MMS with DMSO as I described above, and also having done the same protocol a 2nd time for cleansing purposes, I did end up having another outbreak. I am still a believer in MMS for many diseases, and it did help me in other ways, but as much as it pains me to report, it has not worked for me as a cure for genital **herpes**. I've read testimonials where it did seem to work for others, so if you are thinking of trying it for yourself, this is not a reason to give up.

### **(Crissy)**

Hi, I have been a long time lurker, I think it's time to discuss my experience. I caught **herpes** from my ex, I first discovered it when I had the usual burning and itching but this I could handle, the worst part for me was the anxiety attacks and low mood and fatigue. With the first outbreak, the load mood lasted a good month.

I have always been very healthy (body builder) and have always watched what I put in my body. That first outbreak was about 9

years ago, I had not had a single issue with it until...

We had just purchased a house that needs a lot of work, I decided to step back from the gym for 3 months, at the same time I had a nasty scare, I had a mole that might had become cancerous, all of this negativity caused me to become very anxious and tired, that old feeling starting to creep back, I never really combined the two until I had the outbreak, this feeling lasted a week before I decided to start on mms. I did protocol 1000 for 3 weeks but had some major issues, the sickness and tiredness was just to much. My mood had lifted but I was still tired and had the feeling that it was still lurking. That's when I decided to really tackle it.

I started using CDS on a hourly basis, I found this a lot more palatable with no side effects, I then started on my usual gym routine while taking 2 protein shakes, creative, l carnatine and l glutamine and BCAA's all of the above help me train and recover better.

I then looked from herbal remedies that would support the immune system, so I also took kelp, orleander tablets and curcumin 99. Within the first week all symptoms had gone and my mood was back to normal. I have continued with

this routine for 6 weeks, my plan is to go for 3 months. What I have learnt is that your body is so unique and likes balance, wants it becomes unbalanced and negativity creeps in then you are opening up yourself to all sorts of problems. Nature and the evil pharma companies have given us some pretty awful viruses and infections, but like our bodies, nature also likes balance and has given us all the cures we need, if we know where to look. I truly believe that we should be looking at over remedies that work well with MMS.

### **(Danny)**

I have been on the mms1 kit for around 2 months now, curing myself from the hsv2 virus. I had a worst outbreak a few weeks ago then I have ever had. However, I know this happens and it is sign of the virus getting weak and leaving my body. And it has healed up and I feel great.

### **(Janice)**

I regularly got painful cold sores on my lips, especially after a day in the sun where the uv Ray's broke down the immune system In the skin. I always knew when it was about to erupt into a painful sore as the spot on the lip became itchy. I decided to dab some MMS on it as soon as

I was aware it was happening. The result was it didn't develop into a blister and I saved myself for an ugly sore. This was several years ago and I'm happy to say I seemed to have rid myself of the **Herpes** virus as I haven't had a cold sore for a very long time even though I have taken to much sun at times and would normally have ended up with a cold sore.

### **(Szilvia)**

I would like to tell you guys about my **herpes** cured story. About 10 years ago I got **herpes** from my ex. Usually I got outbreaks every once in awhile. But when I partied (alcohol) before my period, almost always had an outbreak. So after I finished the Protocol 1000 I was really excited to try it out if it really cured my **herpes** or not? So I "partied" 2-3 times a month and I made sure I had lots of drinks before my period . I did this for more then 4 months now..And I am gladly telling you that **NO OUTBREAK AT ALL** !!!! I am sure it cured cuz back then in this case I would have at least 2 outbreaks in 4 months, if I partied like crazy!!! The very first day I started the Protocol , I got an outbreak. It lasted about 10-12 days. Every single day I did spray protokoll at least 3-4 times a day and off course

drinking as the Protocol 1000 telling you. I couldn't have a bath cuz we just changed the old bath tub to a new shower, so I couldn't do baths. But I guess that was not a problem. **OMG !!!** I still can **NOT** believe it !!!! I was very scared to try I was worried if it will come back, but I kept partying cuz I wanted to make sure if it really is gone. And it is !!! **THANK YOU THANK YOU THANK YOU FROM THE BOTTOM OF MY HEART JIM AND MARK AND JOSEPH !!!! LIFE WOULD NOT BE THE SAME WITHOUT YOU HEALING HEROES !!!!! I WILL BE FOREVER GRATEFUL FOR WHAT YOU GUYS DOING !!!!** I am working on spreading the news about MMS cuz I want others heal too !!!!!!! Lets change the World !!! No more sickness and stupid pharma lies !!!! MMS is truly a **MIRACLE !!!** **AND YOU GUYS ARE AMAHHHHZZZING - ZING - ZING PEOPLE <3 GOD BLESS YOU ALL !!! SENDING LOVE FROM HUNGARY ,Szilvia**

### **(Pat)**

I wasnt sure what to do with my genital warts, on my penis. One stuck out the other was more under the skin darker.

I realized I need to spot treat it with a cotton swab and full strenth MMS and DMSO. After showers I would do 3 activated drops with no added water in a small bowl. Id then put a few drops of DMSO. Id also load a glass spray bottle with a similar solution but with some water.

1. Daily dab the full strenth mix on the two spots. It would burn a bit later on. Did this daily. After 4-7 days I noticed the wart sticking out start to shrink but also narrow in width, like it was being "squeezed".
2. Daily when i could, spray more MMS + DMSO on the area of the two warts for extra hits. Like after i would pee id use the spray bottle. Its been a month and the warts are gone, maybe a slight bump so its 99% gone.

Id been drinking MMS sometimes but not often, so I dont know how much of it helped, but I know the DMSO really boosted the penetration of the mms into the wart area, no pun. lol So, dont give up hope. Just stay on it and forget about it!

### **(AR)**

I have lived with this devastating and painfully horrendous virus for 47 years. After treatments with high

strength CDS covering a period not exceeding 3 months overall, my genital **herpes** (HSV2) is completely cured.

It is now over 18 months since my treatment and not a sign of the HSV2 virus have I seen in that time. Previous attacks came every 2 months as regular as clockwork.

My story of how I succeeded with this cure was far too long for a testimonial, so in the interests of providing some really helpful feedback, and for those who would like to know the full story, it is 5 pages, I have presented a document which can be viewed at the following link.

(More Detailed Testimonial)

My Story of CDS and the ultimate final demise and destruction

of the Genital **Herpes** Virus (HSV2).

A long story by “Ancient\_Rider”.

For those of you who know nothing about MMS your starting point should be the book by Jim Humble titled “The Master Mineral Solution of the Third Millennium”. My document is based on the fact you already have a good grounding in MMS.

I contemplated considerably about making a long story of this, but given that many testimonials are rather short,

one extra-long story should not hurt. I believe that some aspects of my story may just encourage someone, also in such a predicament, to have faith in the MMS (CDS). I wanted to show others that no matter how difficult their situation, or what turmoil **herpes** puts you through, this treatment works. The Road to genital **herpes**.

I am now, in 2015, in my 70th year of age. At the ripe old age of 25, in 1969, a one night stand while I was backpacking through South America, saddled me with genital **herpes**. My first attack was devastatingly severe and painful, and being travelling and on the road at the time, made it more difficult.

After that first fateful attack I never had another for 6 months, this time while I was on the road backpacking through Africa, but two months after that, when I returned to Australia the attacks started coming every two weeks.

At that time (1971) doctors in Australia knew nothing about it. After being fed every antibiotic in existence for several months on end, I was eventually sent to a specialist with gave me my life sentence news, and told me there is nothing more they can do for me. At 27 years of age I was totally devastated. This started a cycle of total depression from which I didn't emerge for many years.

The Bad Effects of the virus. Genital **herpes** can effect different people in different ways, for myself that was in the most triple severe category. There are those who probably think that this affliction is nothing more than a few inconvenient blisters. Well, unless you have been saddled with this debilitating problem you really have no idea. As for my attacks, they consisted of severe and agonising pain and swelling in the prostate, bladder and rectum, also affected was the skin with the nervous system surrounding the pubic region and thighs, becoming agonising to touch, and quite often attacking the sciatic nerve down the right leg, so one limped around for a week or more unable to walk properly. The severe itching followed the initial pain 24 hours later, affecting an area about 150mm radius of the pubic region, an itch which is impossible to describe, and for which nothing provided relief. And last of all followed by the inevitable 10mm to 15mm circle of painful blisters, which usually appeared on either the penis, scrotum or in the pubic hairs. The blisters of course, if you did not take care of them, infection would follow, and the lymphatic system in the groin, would become swollen and painful.

And all of this would be coupled with severe depression which triggered every time an attack came. All in all a great package. At times, not many, three or four that I can remember, the attacks would lock themselves into the pain syndrome without ever leading to blisters or finality of an attack. The longest period I remember this happening was some 9 months in length and the pain never subsided until another major attack decided to eventuate and put things back to the normal horrid cycle.

In my first two years back home after travelling, **herpes**, attacks came every 2 weeks, no doubt triggered by the severe depression/stress cycle this whole scenario had me locked into. A nightmare, ten days to get over one attack, four days of peace and the next would start. After that two year period I tried very hard to come to grips with my allotted course in life, and the attacks levelled out at every two months, as regular as clockwork, and for the next 29 years maintained that two month pace with the severity, listed above, never lessening over all that time.

My **herpes** caused cancer. Then when I was 58, I was diagnosed with cancer of the rectum. Now as the rectum was one of the most severely affected

areas with each attack, it was always my considered opinion that the cancer was caused by the **herpes** virus and blisters in the rectum that did not heal. Not too difficult to come to that conclusion given the severity of the **herpes** attacks on the rectum.

The inevitable and barbaric chemotherapy and radiation treatment, and I got through the cancer, and from that time, after cancer treatment, I went on to suppression treatment with aciclovir, three per day, to make sure the attacks did not come again. My thinking being, that if I could stop the attacks then the risks of cancer returning would be minimised. Mind you at 58 that was the first time I ever heard of aciclovir. Given the fact that I was run a merry dance for five years when I was a young man, by doctors, who of course told me it was incurable, but always promised me hope, I never discussed **herpes** with any of them ever again, until cancer diagnosis, when they told me that **herpes** can kill you when the immune system is killed off by chemotherapy. After that comment, the decision to go on aciclovir at that stage was pretty easy. Bad generic drugs. I was on aciclovir, three per day for ten years with no attacks. Then I changed to a generic

brand of aciclovir. After about a month on that brand, the **herpes** virus found a way to start attacking again. I had it on good authority after that, the generic brands are poor quality and not very good. They are usually made cheaply in Asian countries, and should be avoided. In short the generic did not work properly and allowed the virus to evaluate a way through the suppression. Even though I went back on to Zovirax (the original and the best), the attacks, although very minor, would come regularly. The new attacks were rather painful, could last for two weeks or sometimes only for twenty-four hours, but never created the itching or blisters of the original attacks, and eventually went away. Remember I was still on three per day Zovirax. These attacks mainly affected the bladder and the prostate. The Road to MMS (CDS). I first heard of MMS in 2007 but it was not until about 2013 that I started realizing that some people were having success with the eradication of genital **herpes**, as I was alerted by emails from Genesis2Church. I started following MMS much more closely at that point. My wife on the other hand, about this time was told to have root canal treatment for a tooth

infection. As root canal is a fate worse than death, and the only other option is to remove the tooth, she decided to try the MMS. After six weeks of that treatment the tooth problem was solved. She returned to the dentist who could no longer find a problem with the tooth. (She used the original MMS as detailed in Jim Humble's book.) So at last we had our own positive proof that MMS can solve major infection problems. But would it work on a virus, and one that was as dastardly and clever at hiding in the cells as was genital **herpes**, that was the big question?

My first treatment.

With my renewed minor virus attacks continuing, and the aciclovir not managing to prevent them, I decided it was time to do a course of MMS. Living in a remote country location and working outside and away from my house mostly every day, I was reluctant to get involved with the MMS mixing scenario. I also didn't like the idea of getting any type of stomach problem while I needed my health to keep working, so I decided that CDS was my best option. I purchased some concentrated CDS, 24000PPM from a Genesis2Church recommended source in Australia, and commenced to take the drops at

a dosage rate of one drop CDS per one drop of the original MMS directions. At that point I stopped taking the aciclovir, totally removing any protection that they still provided. I quickly pushed up to 8 drops per hour and continued that dosage for ten hours per day for ten weeks. The **herpes** virus reacted rather badly to the daily CDS giving me medium pain attacks occasionally, but never arriving at the itching or blisters. Most attacks lasted about 24 hours and they were gone. After the 10 weeks I stopped the CDS and waited to see what happened. After several weeks, some minor attacks appeared once again to my disappointment. After a few of these I figured I need to do something else. I was not prepared to give up, I wanted this virus gone.

My second treatment.

About this time I was advised of an alternate method of taking the CDS. Approved or not I don't know, and I don't really care, I was ready for something new. The instructions were to take the course with as many drops as you can stand, over a two hour period instead of the ten hours like I did in the first ten week treatment. The instructions were to take the drops every fifteen minutes for two hours. Two hours sounded good to me as I was always back

in the house in later afternoons, so I made my two hours from 2:00pm to 4:00pm. I thought this a good time relative to the fact that lunch was over and the body would not be craving food and would be in a better position to fully absorb the CDS and move that quickly into the bloodstream. I quickly got my drops up to six per fifteen minute period, but with the fifteen minute time frame could not get them higher. I did this for three full weeks. I did find the fifteen minute time interval somewhat difficult, you felt rather bloated with fluid, and the taste of the drops started to become annoying. (Please note not as annoying as the original MMS.) I did however find that the drops were more palatable if I took them in cold water from the fridge. You were always glad when 4:00pm arrived but it took a long time coming, but a nice cold beer about an hour and a half later washed the events from my mind. On reflection after my first ten week CDS treatment, I now believe the perceived attacks after that first course of CDS were simply harmonic reflections of the original **herpes** virus winding its way out of the energy spectrum. Perhaps I did not need the second course, who knows, but as the virus is completely gone

I'm not sorry I tackled that second course, better to be sure. It may have completely faded away without the second course but my theory at that time was that it was still in my system.

Alternate applications.

During the first ten week course I added two other methods to apply as much pressure as I could to the eradication of the virus. First one was from information I received from Genesis2Church, and that was using a mixture of MMS and DMSO in water and rubbing that on the lower spine. I managed a few applications of that but in the end my skin reacted badly to that mixture breaking into severe itching so I abandoned that treatment after two separate attempts.

The second was from information I noted from the Genesis2Church Forums, and that was that some people were suggesting the hot and cold shower treatment on the lower spine shocked the virus out of its hiding place. That method was to take the hot water, as hot as you can stand for as long as you can stand, on the lower spine, then hit it with the cold water. I used that hot and cold water treatment quite a few times. I have no idea of how much, or how little, these additional methods helped, but any method had to be better

than none in view of what I was trying to remove.

The shower treatment seemed to have a reaction to that action from the virus, with what I felt was some pain and annoyance on the following days after the hot and cold treatment. I can perhaps assume from this that the virus got disturbed popped out of its cell into the bloodstream and got hit on the head with the CDS. (Perhaps.) I thought it was worth the try and looking at the final results I don't know which one helped the best but I guess they all worked together as the final results was a positive cure. Good results, genital **herpes** cured.

I finished that second course many months ago, and have not seen the slightest sign of the genital **herpes** virus since. At time of this writing November 2015, it has now been over eighteen months since I finished all treatments and not a sign of genital **herpes** attacks have I had in that time. And I state here, in that time since, I have encountered some emotional turmoil that in the past would have always triggered a **herpes** attack. I do believe with absolute certainty, for the first time in 47 years I am now clear of the **herpes** virus. Overjoyed in not really good enough to describe it. This virus totally

ruined my life, at times I wonder how I kept going. But at least now I can contemplate my later years and plan future events, knowing full well I am not going to be saddled with an attack at a time you would least want one, which usually happened.

The problem with a genital **herpes** life sentence is that it is not the type of problem to even discuss with anyone, so telling people my problem was never an option that was going to be accepted. This was very much an alone path to walk. Also considering the mentality of most of society, where genital **herpes** is primarily the source of great jokes from low types who have no idea of what a person with it goes through. This virus is taking over the world and the number of people who have contracted it is enormous. Never a word do you hear from the media regarding protection and avoidance of this horrendous monster.

Final summary.

I occasionally consult an alternate practitioner and he has also confirmed that the **herpes** virus is no longer resident in my system. That was my opinion before I asked him, he simply confirmed my assessment. I have no intention of getting a blood test to prove the finding, I hate doctors at the

best of times, I don't really care who believes me, I know it is gone forever, and I'll leave it to doctors to keep prescribing aciclovir to poor unfortunates, keep them ignorant and in the dark, keep telling them it is incurable and keep Big Pharma in the style to which they have become accustomed. Big Pharma will not be happy as I am no longer on their expensive drugs.

I hope someone can gain from my story and realize that no matter how difficult the path is, or has been, and how bad the attacks are, that all you need to do is persist with MMS (CDS) and it will be gone. I for one have considerable faith in CDS above standard application MMS, and would use no other in any further treatment I undertake for whatever in the future. In the end I could not believe how simple it really was to eradicate this monster after all this time. What I find really sad and annoying is, that I could have had a marvellous life not overshadowed by this viral monster, but alas all we had were doctors telling us it was incurable, there was no MMS or Jim Humble back then. And to Jim Humble I can only say "Thank You" for your efforts in making this knowledge public. I've always been a very anti-drug person, I can still

count on two hands the number of headache or pain killers I have taken in my life. I never took pain killers with my **herpes** attacks primarily due to my hatred of drugs, I learned to tolerate the pain and the itch. I was glad to say goodbye to the aciclovir and I take no other doctors drugs and don't intend to start. Sadly too many people are up to their eyeballs with drugs and are afraid to dump them in favour of MMS. If people could realise just what a Band-Aid measure drugs are, they would stop taking them and search out the real reasons for their malady. The system has people lured into the false reality that they cannot go on living without all these drugs and the help of doctors. Alas too many people live in the vain hope that all they have to do is go to a doctor, get a prescription for some drug or other, and all their problems will just disappear. That is not the answer.

On the last positive note, I did have two wives and three children, none of whom never caught the virus. Believe me, you don't know the meaning of vigilance until you go through the routine of making sure you don't pass it on. To all of you that have this virus, think long and hard, don't hesitate any longer, and start on

MMS (CDS) without delay. And if you don't like the taste of MMS and if you don't like being ill from MMS, I strongly suggest you consider CDS. I never got ill or had diarrhoea once, the taste is much more pleasant and fairly easy to take, especially in cold water. And in consideration of the very strong solution of CDS that I used that was extremely effective in removing this virus, I strongly suggest you get hold of some of that without delay.

### **(Adrian)**

My wife doesn't write in English really well and has asked me to write this testimonial. At the time of this writing, she has been taking the Protocol 115 (unofficial code) for one week. Four years ago, my wife (now 47 years old, Asian) went to see a dermatologist for a persistent bump on her chin that kept coming back and spreading. After seeing countless dermatologists over that four year period and taking numerous antibiotics, antifungal, antiparasites, antiviral, accutane, the condition continue to worsen. These drugs cannot be taken forever, because they eventually will damage her kidney and liver. The bumps continue to spread fo her cheeks all the way to the skin around the eyes .

They are throbbing and painful so he must take Tylenol (pain killer) twice a day.

At the end, the doctor always use an immunosuppressant drugs (cyclosporine, or prednisone in the past) to treat her condition. Doctors use cyclosporine to treat transplant patients to weaken the body's immune system so it won't reject the new organ. They shouldn't use this drug if the disease is caused by bacteria, virus, etc. since this drug is actually weaken her immune system. So this drug only treats her symptoms (inflammation on her skin and not the cause) and may actually worsen it but the problems are no known solutions after trying numerous different drugs.

Below is a list of the diagnosis her doctors have given her over the four years period (listed chronologically):

acne, hsv-1, impetigo, rosacea fulminan/pyoderma faciale, folliculities.

Below is a list of medications she has taken:

- antibiotics: keflex, dapson, clindamycin, minocycline, doxycycline, ciprofloxacin, azithromycin.
- antiviral: acyclovir, valtrex.
- steroids: prednisone, kenalog injection, desonide, clobetasol
- immunosuppressant: cyclosporine

- antifungal: fluconazole  
- antiparasites: ivermectin  
- other: accutane, protopic  
This disease really changes her life and my life as well. She couldn't go out because these bumps don't look like a regular acne at all and more like an infection. We spent our vacation days visiting doctor's office. When she go out, she must cover her face. They also biopsied her face four time by taking a chunk of her skin and found nothing under the microscope. When she has severed flare up and feeling despair and hopeless, she talked of suicides because her once beautiful face is now ruined and the doctors don't know how to cure it.

So, this year, the disease is almost untreatable with those drugs and starting two months ago, she has been taking a cocktail of these medicines together daily: 1000 mg of Keflex (antibiotic), 1000 mg Valtrex (antiviral), Accutane 60 mg (synthetic vitamin A, very potent and dangerous drug at high dose like this since my wife only weighs 95 lbs / 45 kg), and cyclosporine 200 mg (immunosuppressant). The disease continues to come back and the doctor two weeks ago told my wife that he will take a biopsy again on the skin next to her left eye the next time she

visits him. This will leave a permanent scar on her face. She already had one on her chin (taken four years ago).

So, I kept on searching for alternative solution and found a video on youtube about MMS. My wife intially was skeptical and at the end decided to try it after seeing MMS cure my dog of her urinary tract infection condition. My dog was peeing all over including on the seat of my car and there was blood on her pee. She was cured in two days.

So, I went to mmsinfo.org and asked a question there for help. Charlotte helped me with the knowledge. She was very kind and responded to my questions with patience and quickly. She taught me how to create CDS using the overnight method and pointed to me to try Protocol 101 (using CDS for 8 hours period). On the night my wife took her first CDS, she felt stomach ache in the morning. So she stopped for a day and tried again. The bumps continued to worsen slowly and the pain was still there. Maybe because it's been for a few days but then Charlotte mentioned of Protocol 115 to be considered. So I started giving my wife 10 ml of CDS (2500 ppm) in 16 oz water and asked her to drink 2 oz of it every 15 minutes for 8 times (all within 2 hours). The

effects were fast: the pain was gone over night. The bumps are shrinking (about 20% each day) and within a week, it is almost flat (about 10% left). Please use this dose only if you are familiar and knowledgeable about MMS. The MMS gives us hope and so far it is working for her. She now can go out and laugh more. We cannot say that she is cured now because it's been only a week, and this disease in the past always returns. However MMS does improve her skin condition now while all of those expensive and high-risk medicines could not do. I felt compelled to write this testimonial early in case others have similar skin problems and can benefit from it. Thank you Jim Humble, Charlotte, and all those people who made the testimonials. You have given hope to the hopeless and eliminate sufferings of the sick and their family. Thank you, Adrian

### **(Shekhar)**

My mother had unbearable pain in leg as she had an attack of Shingles / **Herpes** Zoster. She had very little knowledge of protocols. Yet she took six drop doses three times a day for three days. The consequent over reaction was unavoidable but

the inflammation of the nerves was gone with just light tingling sensation remaining on the fourth day. This is a miracle given that others with similar condition wouldn't want to live with the pain. This is without any prescription pain killers or anti-virals.

### **(Tim)**

For those of you who can't avoid getting re-infected (ornery spouse), or who have a nasty strain of **herpes** that regularly comes back I have found that a solution of Ca hypochlorite of 1/4 tsp per 16-20 fl oz of water used via Q-tip cotton swab onto tingling areas (signaling the potential approach of blisters) such as in or around nostrils, corner of lips, around and in eyes (stings a little but never hurt my eyes), has when used morning and evening stopped it from developing further, taken the irritation out, and caused it to subside quickly, ...esp. when an adult takes 15-20 alfalfa tablets, chews up and washes down with lemonade or grapefruit juice at same time. This same solution makes a very effective tooth and tongue brushing solution. ...have used it for going on 2 years now. ...Not for swallowing. Water-pik -ing using a little of the solution in the pik water does a good job of cleaning out

most infections holed up in crevices. ...for stubborn infections I have found a touch of 2% iodine at base of infected tooth (hold mouth open and spit out, after a minute rinse out with water) the iodine will knock things the MMS 2 solution can't ...that is my experience. If done right it won't do anything but help clear out bad microbes. ...these might not be the best solutions for a person with a mouth full of amalgams... but what is.

### **(Gage)**

I was diagnosed with **Herpes** about 4 months ago and that was probably the hardest news for me to hear. I felt dirty and untouchable. I went home and told my partner and my parents immediately.

I knew my dad was taking MMS for other health reasons, but I had no clue about what all the amazing things that MMS could help your body fight off. My dad bought me the book and a couple of bottles of MMS to get me started. I am happy and proud to say that I got a blood tests two months later and I tested negative. I didn't take it for two months, I followed the protocol, but it took me about 2 months to get the courage to see if what I had done worked.

I am amazed by MMS and the issues that it helps your body with. When I was dealing with **herpes**, I also had bacterial vaginosis and a yeast infection, all of which cleared up. I could not have gotten through all of this without my dad and without this MMS water purification. I refused to accept that this is something that I would have for life and I'm so happy that there was something that could help me.

Thank you Jim for discovering this amazing treatment and thank you to everyone else who has taken the risk to help others all over the world.

**(Rick)**

After dealing with this issue for quite a while and tried a topically applied 28% sodium chlorite solution...(as used to make MMS). Using this cleared up several areas of active "lesions" in 2-3 days or so. Application seems to react strongly to these areas...causing itching...causing some areas to turn a lighter color...then causing redness. Probably best to keep application down to 2xs per day or so. Do not apply right before bed...since you might not sleep due to the itching. After the redness subsides...the

"lesions" dry up and skin gradually returns to normal.

This also seems to work with "lesions" that are more deep seated and aren't active...but also won't go away....though this takes more time.

Strangely enough...application to areas of the skin not involved causes almost no reaction.

The only other remedies that seemed to work have been tea tree oil and Dermatox...both of which seem to repress the issue...but not clear it. Have also been using both of these along with the sodium chlorite.

Cautions: Doesn't seem to help ones hair....so use it in your hair with caution. Obviously...keep it away from eyes. Test in a small area first?

That this issue was shingles has not been verified...but I had chicken pox as a child and I'm in the age bracket when it most occurs.

**(Tobias reporting on GPW)**

"It was requested by the Mother of my Daughter to come and assists with her healing of **Herpes** simplex (lips).

It had become uncontrollable and was spreading around the mouth area.

Approximatly half of the mouth was covered in large unsightly scabs, alive and tingling.

I set to work with MMS, i made a Solution at the advised 1:5 ratio of 3:15 drops mixed with water in a tea-cup.

My daughter, very maturly applied this to the area every half hour as requested.

She also took one drop to five mixed with water internaly (drinking).

The results were obvious within twelve hours.

The moist tingling of **herpes** had reduced and the drying-out process had began.

At 24 Hours, the tingling had reduced to 20%. The continued healing was obvious.

At 48 Hours, the vague remembrance of this irritating out of control "virus" merely lingered and the scabs had dried up and fallen away.

At 72 Hours the Problem was solved and **Herpes** completely gone!

Continued one drop-to-five maintainance Dose for seven days, as immune system booster."

**(Casey)**

After years without an outbreak, I woke up with the telltale itch. At first I thought it was a spider bite on my butt. It didn't take long to figure out I was having a genital herpe outbreak. First I took out the pharmaceutical creme I had stowed away, applied it and low and behold here come two more lesions popping out. I kept putting the creme on hoping that would help since my last outbreak I tried everything from tea tree oil, oregano oil, bentonite clay etc etc. and it lasted for weeks. Well this all started on a Tuesday morning, by Wednesday morning **herpes** # 4 & 5 were appearing then I remembered the MMS that was hidden way back on the shelf. Gratefully, I got on the web site to get the recipe. I couldn't wait to read through everything so I just did 6 drops and 1/4 tsp apple cider vinegar with some water and slammed it. Thursday morning Herpe #1 was dried up. #'s 2&3 were red marks and 4&5 were gone. I got right back on the website and caught up with all that is happening and I AM BACK! FULL TILT!! Facebook, emails, I'm joining the church. I will preach. I will take the test. I will continue to fight for health FREEDOM. I am writing to my congressmen and to my political

party (Libertarian) to let them know what is going on with this ludicrous FDA lawsuit against these Health Freedom Warriors! STAND UP FOR WHAT YOU BELIEVE IN... EVEN IF YOU ARE STANDING ALONE! Peace begins with me. One other note, God Bless You Jim Humble! When your time comes; You sure have earned yourself a high place up there in heaven! Thank you!

**(Sunni)**

My cat was diagnosed with **herpes** in her eye. It would get infected and she'd get crust all around it. Sometimes it would be really bad. I had to pay \$80 each time to take her to the vet and she would get an antibiotic cream and that would heal it for maybe a month. I started giving her activated MMS. I would activate one drop, then add water and squirt a little bit in her mouth. I started with one dose, but would then do multiple doses in a day (but not stronger, just more doses). Within 4 weeks her eye was healed. Not only did the pus stop, but both her eyes became very bright and clear. She also lost weight. She was a little fat, and she slimmed down to what the vet called a healthy weight for an indoor cat.

That was 4 years ago. She's still very healthy and her eye infection never came back! The vet refuses to believe that she's "healed" and told me that **herpes** can lie dormant for a long time and then suddenly flare up. I doubt that's the case!

**(Gene)**

I was suffering from **herpes** encephalitis infection, and also **herpes** wounds on the skin around my eyes. This was going on for about a year, and nothing could help me it seemed. Within days of using MMS the **herpes** around my eyes disappeared. Within a couple of weeks the **herpes** encephalitis infection was gone. I used the MMS 1000 protocol. I started at one drop, and worked my way of to 3 drops every hour (6-8 times a day). I would like to add that in my experience doing many small doses of MMS every day seems much more effective than a few large doses. As you know, **herpes** encephalitis is a very serious condition. I was very sick. I tried everything conventional medicine and alternative medicine could offer. Some remedies did offer some temporary comfort, but only MMS could cure me, believe it or not!

I am now several months without any symptoms. I would like to thank Jim Humble for his mission and having given me my life back. Thank you.

**(Kitty)**

I had a cold sore coming on although I didn't realize it at the time b/c I was taking MMS, so my only indication was that my right nostril looked a bit red and a wee bit swollen. I finished my 21 day protocol in the meantime with no other discomfort or indicators around the nostril. The other day when I looked in the mirror I noticed what looked like fresh skin with a little bit of old skin sloughing off.....I thought "that's odd, it looks like what it does when I have had a cold sore when new skin appears after meds and 10 days of treatment." I completely believe that MMS arrested the development of that cold sore! I have had them in and around my nose on and off for about 10+ years. I know after all that time what it feels like coming on (tingling, red, then the appearance of bumps and then full blown...omg!! right?) Well, not this time. I swear MMS worked! I even went so far as to spray some on the site to speed recovery & that works too!

**(Vic)**

I contracted a cold sore (**herpes simplex 1**) while on vacation. Luckily I packed my spray bottle and DMSO (70/30) dropper with me. I used the spray protocol and did it every day for five days 8 hours a day. I cured my self by the fifth day! I experience very little discomfort and I believed it accelerated the healing process. I have not had a recurrent outbreak since. MMS 1 Works!

**(Ken)**

Just wanted to share our most recent healing experience with MMS.

My wife broke out with "Shingles" of all things. Shingles comes from the Chickenpox virus as a child and lies dormant in the body until later in life when a person's immune system is weakened. Then it breaks out. I think they have trigger elements in our environment to cause these outbreaks; as with many viruses men have made for evil purposes of greed, manipulation and control (but that's another subject).

However, we searched the internet to make certain of what it was compared to symptoms and visible photos. We stated

building her immune system up by diet and I had some homeopathic pain lotion for the pain. Pain seemed to be horrible to my wife. The pain was reduced and kept to a minimum with the pain lotion. We followed some natural ways of dealing with the shingles and it helped a lot. We were getting good results and the outbreak or spread had stopped. The listers were still full and tight visibly. And then I remembered the stories of malaria in your book that I purchased. I said, if MMS can kill this virus in a couple of days, surely it will work to kill this shingles virus. So, I discussed it with my wife and she agreed to take it, instead of going to the doctor. So, I started her a regiment of 5 drops in the morning, 5 drops in the evening and 5 drops before going to bed. I didn't want to make it any stronger, because she hates the taste and I certainly didn't want her to be discouraged in anyway. The blisters begin to shrink and dried up. We knew the shingles were licked. We went to 5 drops in the morning and 5 drops before bed. This is shortened for time sake. But the whole process was just a few days for the blisters to stop and dry up. Because of what I read about the dormant nature of this virus, we decided to do the drops for a

few days after all symptoms went away.

**(Megan)**

Every now and then when I slept badly or was in a weak condition, I used to get SHINGLES.

Terrible spot the size of making a circle between my thumb and indexfinger covered in blisters and with a terrible pain.For weeks at end I would suffer from the burning sensation.

Now my mother gave me 4 drops of activated MMS1 every hour for 6 times the first day. Then I became nauseous and cut back to 1 drop every hour the second day.

But then the third day the SHINGLE-spot was dried up already!!!! I am elated.

Now I use protocol (MMS)1000 to attack the rest of my diseases. Praise God. I am so happy. It truly is a miracle mineral provided by the Lord.

**(Brian)**

I have taken MMS for 18 month at 6 drops twice per day. I do not have any mouth ulcers or **herpes** outbreaks anymore! I also noticed I sleep much better and breath much better.though it has not cured me of my fibromyalgia it has helped. I will

try the DMSO with MMS1 very soon for several months.

My brother had a bad case of intestinal flu for a week and popped over one day, I said,"Give this MMS a try!". He took 2 drops and went straight home. He phoned me back 20 mins later saying all his discomfort had gone somehow. So he came over for some more just in case but he ever needed anymore.

**(Christo)**

About 6 months ago I was searching for some kind of relief/cure? for genital **herpes** for my wife and myself. I have been suffering from **herpes** outbreaks for 18 years and gave my wife the gift that keeps on giving last year and she has been miserable with almost non stop outbreaks:( It sure has taken its toll on our sex life. I stumbled across mms surfing the net and immediately bought the video, the book and the product. We both started with morning and night applications, starting with 1 drop and working our way up to 15 drops, each day adding another drop. When we go to 13-15 drops it was way to hard (diarrhea, abdominal cramping, loss of energy, and for me hot flashes, crazy sweating all the time). We backed down to 10 drops in the morning and 10 at night for a

month straight. I admit we did miss a couple here and there but we we persistent. Honestly, we stopped after that because I got tired of the hot flashes and low energy. After stopping all our symptoms mentioned above returned to normal.

Now from the info I read on the net, it is recommended you take 15 drops twice a day for a month the **herpes** virus is close to the surface of the skin and you need to reach the point of saturation. Bottom line is I am cured, my wife still continues to get outbreaks and we are beginning another month and a half long treatment. It has been close to 5 months and I have not had one outbreak, which is a huge breakthrough. It is worth all the weird side effects to be free of that ugly beast called **herpes**.

**(Ananda)**

"A little update on the **herpes2**. well after the 3 or 4 days of the tingling feeling and the sensations of a sore that never came out, i am happy to report that not only was there no breakout but now, for me, as my husband, the tingling and any sensation has stopped also...

...looks like the **herpes** was not allowed to do its thing with us this time! thanks to mms.

before mms, on the average, i had a hsv2 breakout about 2x a month --- sometimes 1---sometimes 3 --- but i have always, like clockwork, had a breakout during my period or right after, so it will be interesting to see what happens in 2 or so weeks when my menses comes.

i uped my dose from 5 drops 2x a day to 5 drops 3x a day rather than increasing the # of drops-- b/c i still get a little nauseas with 6 drops or over ---but i seem to be fine with 5drops 3x a day the last two days.

i also wanted to mention that i feel a bit more clear in my head (brain fog for years)and i have less headaches. much of the stiffness and aches(especially in my neck and legs) have vanished since being on mms. also, in the mornings i used to feel like i was hit by a truck when i woke up ---but now i feel like i was only hit by a bike. its pretty amazing that all this happened only since jan 1st 2008 --- that much occurred for me in about a two week time frame! i used almost every type of holistic/natural/alternative health kick out there for over 15 years, and never have i had a shift like this in such a short period of time! ...and all for 25

bucks! --- i have spent thousands and thousands.

i have never felt this impressed with a supplement in all my 15 years of being on this path!

not to say that much of what i have done did not help me alot...it really did! but not so OBVIOUSLY and QUICKLY as the mms! i also know i have a long way to go still and i have to continue with many of the things i have been using (green superfoods,vit/mineral supps./herbs,probiotics, healthy foods/etc. etc.).

I really want to thank JIM HUMBLE. he is making me a better mother for my children.. i hope he knows how many he has touched!

well,thanks for listening

## **HIV/AIDS**

**(Chrissy)**

MMS is not toxic - presentation of study and treatment results from a Malawi hospital (**HIV / AIDS**, if this virus exists, but the symptoms are present); from June 2009 to March 2010, more than 800 people were treated; Improvement after 5

days; secondary diseases such as cancerous growths could also be alleviated; (Of the 800 people, 40 also had cancer, 50 had no sensation in the arms and legs, 5 had heart problems, other hepatitis C and malaria); these diseases have been cured; **HIV** disappeared completely in 1 patient) - Criticism: **HIV** test is based on antibodies, but these are also present in the body after healing; consequently, people are treated unnecessarily against **HIV**) - MMS does not release chlorine - MMS also eliminates heavy metals - The chlorine dioxide formed remains active in the body for only 1.5 hours - Areas of application of chlorine dioxide: bleaching of paper, water treatment in cities, spray for fish at fish markets ( after Hurricane Katrina, dishes and furniture were cleaned of microorganisms in a tent using MMS) - Already discovered in 1980 that chlorine dioxide kills parasites in the blood - Pharmaceutical industry is observing patent applications (1990 and 1993, 2 patent applications that **HIV** and cancer can be cured using MMS; these were naturally rejected) - Vitamin C neutralized MMS (therefore do not use both together; do not use juices with vitamin C to drink MMS) - There are at least 10 other chemical substances that work

like MMS - One speaks of MMS 1 and MMS 2 (in capsule form) - Invention of MMS 2 ": The neighbor of Humble and he even have pool cleaner drinking; in this way prostate cancer disappeared; MMS 2 produces hypochlorous acid, which strengthens the immune system. 2 About the lecture: - MMS is not toxic - Presentation of study and treatment results from a hospital in Malawi (**HIV** / AIDS, if this virus exists, but the symptoms are present); from June 2009 to March 2010, more than 800 people were treated; Improvement after 5 days; secondary diseases such as cancerous growths could also be alleviated; (Of the 800 people, 40 also had cancer, 50 had no sensation in the arms and legs, 5 had heart problems, other hepatitis C and malaria); these diseases have been cured; **HIV** disappeared completely in 1 patient) - Criticism: **HIV** test is based on antibodies, but these are also present in the body after healing; consequently, people are treated unnecessarily against **HIV**) - MMS does not release chlorine - MMS also eliminates heavy metals - The chlorine dioxide formed remains active in the body for only 1.5 hours - Areas of application of chlorine dioxide: bleaching of paper, water treatment in cities, spray for fish

at fish markets ( after Hurricane Katrina, dishes and furniture were cleaned of microorganisms in a tent using MMS) - Already discovered in 1980 that chlorine dioxide kills parasites in the blood - Pharmaceutical industry is observing patent applications (1990 and 1993, 2 patent applications that **HIV** and cancer can be cured using MMS; these were naturally rejected) - Vitamin C neutralized MMS (therefore do not use both together; do not use juices with vitamin C to drink MMS) - There are at least 10 other chemical substances that work like MMS - One speaks of MMS 1 and MMS 2 (in capsule form) - Invention of MMS 2 ": The neighbor of Humble and he even have pool cleaner drinking; in this way prostate cancer disappeared; MMS 2 produces hypochlorous acid, which strengthens the immune system (for MMS 2 see [www.jim-humble-mms.de/mms2/index.php](http://www.jim-humble-mms.de/mms2/index.php)) Introduction to MMS2 OK, what is MMS2? ([www.jim-humble-mms.de/mm s2/einfuehrung/index.php](http://www.jim-humble-mms.de/mm s2/einfuehrung/index.php)) Which chemical substance is hypochlorous acid in the body? It is also used in swimming pools, it is called - swimming pool chlorine. BUT it really is NOT chlorine. It is a special substance that is used to "create" calcium hypochlorite.

People are used to being told that you can get the pool sanitized with chlorine, but it's not really the scientific fact. It's just easier to explain it to people this way. The scientific facts are that no free chlorine is added to the pool. The pool is actually disinfected with hypochlorous acid. A bag of 78% calcium hypochlorite (about a pound) costs less than \$ 5 dollars in the United States. You can buy it in any pool supply store, but don't buy any chlorine, it must be calcium hypochlorite. Quite rightly, when it gets into the pool water, it immediately changes to hypochlorous acid. It is not the same as chlorine in water, not at all. Other chemicals change to chlorine, but not calcium hypochlorite. It changes to HOCl (it's the chemical formula for Hypochlorous Acid). It is a combination of hydrogen, oxygen, and chlorine. Like table salt, it has chlorine in it, but it reacts far differently than chlorine.

**(Anon)**

**HIV CURED!** Just came in but this was from 2009!

**(Anon)**

Back in 2014 I was deliberately infected with the **HIV** virus by a vindictive former girlfriend who

lured me into a sexual encounter a year after our breakup. After the encounter she gleefully informed me of her status and for me to quote "have a nice life". Subsequently 6 months later I was tested after experiencing many of the classic symptoms and was found to be positive. Doctors immediately insisted that I start taking a battery of PI's, and NRTI's which do not cure the disease and have many life shortening side effects. It was at this point that I applied the MMS1 protocol which immediately addressed my symptoms and I have been healthy and strong ever since. I deliberately avoided being retested until recently by my primary care physician who stated, "after applying a series of tests, your results are negative for **HIV-1 RNA**.....**HIV 1 AB** and **HIV 2 AB** are all negative. You are clear to give blood just keep this record handy for future reference". Needless to say, I am grateful to God for His mercy in sending this solution to me in such a timely fashion. I have never shared my story with anyone until now. Today I use MMS for a lot of things and have relieved suffering among family and friends. Believe me **MMS WORKS!!!!!!** By the way, I live in a large city in the southeast United States.

**(Anon)**

You may remember me from 2 weeks ago when I wrote to you about my predicament with my **HIV** results. I realized when I read the book that I was taking protocol 1000+ wrongly and immediately started following what the book says. Guess what???! Just about 12 days of taking the protocol as the book says, I am undetectable!!! I am very happy thank you!!!!!!!

**(Fatima)**

You may remember me from 2 weeks ago when I wrote to you about my predicament with my **HIV** results then you ended up sending me a book. I realized when I read the book that I was taking Protocol 1000 Plus wrongly and immediately started following what the book says. Guess what???! Just about 12 days of taking the protocol as the book says, and I am undetectable!!! (Free of **HIV**) Kindly refer to the attachment showing the test results I just did. I am very happy-thank you!!!!!!! I am thinking to still finish the 21 days then start taking maintenance doses. Here are some of the things I was doing wrong before I got the book: I was initially mixing the MMS and activator then I would wait

3 minutes (which I now know that waiting that long weakened the MMS1) then I would add the DMSO then wait an additional 3 minutes, then I would add water. The book says to mix the DMSO after adding water. I would also mix all the 8 doses for the entire day and put them in a container which I would drink all day which now I know will further weaken the MMS. I also drank coconut water on some occasions--did not know it cancels out the MMS. Also I would half of the time use boiled tap water for the mixture instead of mineral water. I learned from the book that not all bottled water is ok to use as some of it contains chlorides and other chemicals that would cancel out the effectiveness of the MMS. In addition, I would eat a whole big meal while taking the MMS but after reading the book I got to know that it's better to eat smaller portions and also to space the meals at least 20 to 30 minutes after taking the MMS and before doing so. So as you can see it was a whole lot of wrongs I did. After I got the book I followed Protocol 1000 Plus correctly according to the book and was well in 12 days.

**(Sophy)**

It was 2003, when I was tested **HIV** Positive. In that time I was pregnant with my first child. In December 2004, I gave birth to a healthy boy. At that time, I was taking the booster only.

In 2010, I started to get very sick. I took three months sick leave to recover.

I started to take ARV's in 2011 but I was still very sick. My CD4 count was 130.

I started taking MMS in July 2011 and I was back at work at the end of September 2011- strong and healthy. My DC4 count came up to 609. I take vitamin tablets and eat healthy foods and fruits.

Now I am very strong and healthy, even a previous bladder problem has been cured.

MMS is magic 'muti'. I am still taking MMS even today. I started with 18 drops a day and now I am down to 1 to 3 drops a day.

People must believe in this 'muti'. If it was not for the MMS, I would be counted with the 'death' (dead?). I hope everyone believes in MMS. It

can work for you, if you believe in it and follow the programme.

MMS is my number 1 treatment.

From Sophy in South Africa

**(Stephen)**

A few years ago a mature woman with full blown AIDS was brought to our church for prayer. My pastor asked me to help her since I had successfully helped other people with very serious illnesses. Since she had already declined to take the anti retroviral medication on her own accord, I put her on Protocol 1000. I also gave her my soft-bounce mini trampoline. Since she could not walk on her own, I gave instructions for her relatives to assist her on the trampoline until she could bounce on her own. She also had several healing scriptures which she had to read 8 times daily, just as with the use of MMS and the trampoline. What happened after blew my mind...

Two weeks later a woman fitting the description of a gym instructor strode into our prayer meeting. It took some convincing to confirm that this was the same shadow of a woman with full blown AIDS! We were dumbfounded: it's TRUE!!! MMS is the real deal!!!

I knew MMS works - but not this fast! And so thorough. That very day she had jumped on the trampoline for 1 1/2 hrs! She explained that while the 1st week was exceptionally challenging, she persevered and felt enormously better at the beginning of the 2nd week... and she was only at 2 drops per hour!

MMS is a stand alone powerhouse, and makes other protocols work incredibly better!

**(John)**

I am very grateful about your gift of MMS to the world and to me because it has healed me completely from **Hiv**-infection. I use MMS now for over 2 years, with fullest satisfaction. I did the **Hiv**-test back in 1990 and was put on meds in '96 and I used them up until 2010. Because they were killing me I stopped taking them altogether. But then MMS came and ever since then I live a healthy life. I will go on using it as long as it is available. Thank you Jim Humble for all you did to me.

**(Lisa)**

Hello, I will try to keep this short, but my husband and I are herbalist's in Guyana, South America. We have had

enormous success with MMS. The success started when we were training in North Carolina. Since being here in Guyana, it has been difficult due to the government's resistance to MMS. Mr. Jim Humble was here himself and was no longer welcomed when he gave his men MMS while in the bush here and they recovered. I have treated my clients for cancer, malaria, chrohn's disease, sinuses, **herpes** and some chronic pains of unknown origin. Two clients who had tested positive for **HIV**, reported testing negative after taking the solution. My husband and I use it for the water tanks as our water is rain water, as well as take it on a regular basis. The only obstacle is the government. It is so needed in this country. Would like to attend seminar, but this is a poor country. I totally support MMS and would love to be a teacher.

**(Laura)**

(English translation from Google Translate below)  
 Hola: me dio **hiv** positivo en el 1996, nunca acepte tomar los remedios de azt ni nada, solo me hice muchas sesiones energeticas de tecnicas sanadoras para curar la causa karmica ,emocional,espiritual,eterica,y

fisica,.La tecnica que mas recomiendo es VortexHealing y pueden recibir las sesiones de cualquier terapeuta a distancia,deben buscar terapeutas VortexHealing, pero TAMBIEN TOMAR EL MMS, YO LO TOMO SIEMPRE 3 O 6 GOTAS ANTES DE DORMIR, TOME EL PROTOCOLO 1000 35 DIAS AL EMPEZAR...HACE AÑOS, AUN NO LOGRE Q LA CARGA VIRAL DE INDETECTABLE NI LOS CD4 SUBAN DE 250, PERO NO CREO MUCHO EN ESOS ANALISIS Y SI CREO EN MI DIA A DIA,TENGO MUCHA ENERGIA, NUNCA TUVE GRIPES NI RESFRIADOS,NI NADA RARO,NI ME SENTI ENFERMA NI DEBIL, NI DEJE DE TRABAJAR NUNCA, AL CONTRARIO...Y PASARON 16 AÑOS!! NUNCA ME DEJE INFLUENCIAR POR ESA FORMA DE DARTE LA NOTICIA D E LOS MEDICOS Y QUERER ELLOS HACERTE CREER Q TENES OTRAS ENFERMDEADES OPORTUNISTAS PARA ASUSTARTE, SI APARECE OOTRA COSA TOMEN MAS MMS Y CONTROLLEN CON ANALISIS, Y MUCHA SANACION ENERGETICA !! LES RECOMIENDO MIRAR VIDEOS EN GOOGLE "CASTILLO DE NAIPES" "RETHINKING AIDS", "LA

ESTAFA DEL SIDA", INFOMENSE MUCHO ANTES DE TOMAR LOS REMDIOS DE AZT QUE SI BAJAN LAS DEFENSAS Y SON VENENOS,INFORMENSE DE LAS OPINIONES MEDICAS Y PREMIOS NOBEL QUE HABLAN DE ESTO.IGUAL TOMEN LOS PROTOCOLOS MIL DE MMS POR LAS DUDAS Y EL MANTENIMIENTO.

---

Hello: I gave positive **hiv** in 1996, never accept taking the remedies of azt or anything, I just made many energetic sessions of healing techniques to cure the karmic, emotional, spiritual, etheric, and physical, the technique that I recommend most is VortexHealing and can receive the sessions of any distance therapist, they should look for VortexHealing therapists, but ALSO TAKE THE MMS, I ALWAYS TAKE IT 3 OR 6 DROPS BEFORE SLEEP, TAKE THE PROTOCOL 1000 35 DAYS AT THE BEGINNING ... YEARS AGO, I DO NOT ACHIEVE THE VIRAL LOAD OF INDETECTABLE OR THE CD4 UP 250, BUT I DO NOT BELIEVE A LOT IN THOSE ANALYSIS AND IF I BELIEVE IN MY DAY TO DAY, I HAVE A LOT OF ENERGY, I NEVER HAD ANY FLESH OR COLD, NOTHING RARE, I DO NOT FEEL SICK NEITHER

WEAK, NEVER STOP WORKING NEVER, ON THE CONTRARY ... AND IT WAS 16 YEARS OLD !! NEVER LET ME INFLUENCE FOR THAT WAY OF GIVING YOU THE NEWS OF THE DOCTORS AND WANT THEM TO DO YOU BELIEVE YOU HAVE OTHER OPPORTUNIST FACILITIES TO AFFECT YOU, IF APPEAR ANOTHER THING, TAKE MORE MMS AND CONTROL WITH ANALYSIS, AND A LOT OF ENERGETIC HEALING !! I RECOMMEND YOU LOOKING VIDEOS IN GOOGLE "CASTILLO DE NAIPES" "RETHINKING AIDS", "THE AIDS SCAM", INFOMENSE MUCH BEFORE TAKING THE REMEDIES OF AZT THAT IF THE DEFENSES ARE LOWERED AND ARE POISON, REPORT THE MEDICAL OPINIONS AND NOBEL PRIZES THAT THEY SPEAK OF THIS. THEY TAKE THE PROTOCOLS THOUSAND OF MMS FOR DOUBTS AND MAINTENANCE.

I was diagnosed as **HIV** positive in Australia well over a year & a half ago, the doctor who specialized in treatment of **HIV** recommended I take AZT luckily I wasn't your average bear and told him I would not be going down that path &

would use MMS instead , of course he had no idea what I was talking about, before I go on I want to tell you that the psychological benefits of knowing you have MMS to deal with these sorts of conditions is tremendous, the nurse was convinced I would need counselling, as most poor souls simply see it as a death sentence, and told me to make an appointment when the truth of my condition slammed home, This never happened, Knowing I could deal with the condition by myself using MMS was a tremendously empowering position.

I immediately started the protocol 1000 regime, sometimes I missed a hour but plugged away and actually did over 5 to 6 weeks in the end, I got used to drinking it neat with water, mucking around with juices just complicated things, I still to this day drink it neat with water, it's unpleasant but not intolerable, I usually swill it in my mouth before swallowing just to do the teeth as well, My energy levels and overall health are very good with no colds flu, or other indicators of lowered immune efficiency showing up, I have been fighting fit for over a year now since I treated it with the protocols described in the latest e book,

I no longer consider myself **HIV** positive no matter what my file may say, I know I'm well, On another MMS related story that happened a few days ago, My sister in law became afflicted with Typhus from bad ground water (they live next to a canal here in Indonesia) unfortunately I wasn't informed about her condition until 7 days had gone by ,but once I did find out I went to see her next door & she was laying on the bed in a sore & sorry condition, I gave her 3 drop twice in 2 hours, , the next day waking up well enough to go to work as a teacher, I have given here 2 follow up doses just in case, And she has recovered 100% very quick results I would say,

### **(Chris)**

Hi everyone!!!!  
I'm here to share some great news: after my wife tested **NEGATIVE** for HPV (already mentioned that story here a while ago), it was my turn: Took the PCR (RNA) test for **HIV** and guess what???

Results came **UNDETECTABLE!!!!** I'm so damn happy!!!  
CD4 is still a little low, but the doctors said the Viral Load is **THE** most important thing and now that **NO** virus was detected

in my blood, he's more than positive CD4 counts will raise. Also, it's important to note that I couldn't wait the three months as recommended by Jim after finishing the Protocol because my doctor requested my to take the test.

IMPORTANT: I've been on Protocol 4000 (MMS2) for exactly 105 days (29 days for maintenance)....

And besides the Protocol, Faith and Hope played real important elements, as I prayed a lot with each MMS capsule I took. Maybe in three months I'll take the elisa test, and God help me that will test negative too!!!

For those who wanted a testimonial, here you have it. I'll try to copy the test results here (sorry for the language, it's in portuguese):

VÍRUS DA  
IMUNODEFICIÊNCIA  
HUMANA-1 (HIV-1),  
QUANTIFICAÇÃO DO RNA  
Método: Reação em cadeia da polimerase (PCR) em tempo real

Material: RNA extraído do plasma  
RESULTADO VALOR DE REFERÊNCIA  
INDETECTÁVEL  
INDETECTÁVEL  
Limite de detecção: 20 cópias/mL (34 UI/mL).

NOTA(1): Um resultado "indetectável" indica que a viremia está ausente ou se encontra abaixo do limite de detecção do teste.  
NOTA(2): Este teste não deve ser utilizado para o diagnóstico de infecção por HIV-1, exceto em situações clínicas bastante particulares.

Peace, Love and Health to everyone!  
Chris, from Brazil

Just a quick note. I have been helping someone with HIV using MMS. Today he reports that his viral load is only 125. Last lab was 700. He doctor says

his blood work looks almost normal. They are astounded! Asked him what he has been doing and he has not told them as of yet. He has been doing 6 drops 2 and sometimes 3 times a day over the past 7 weeks. He feels great and has gained weight. We are all very excited here!
