

THE DANGER OF FLUORIDE

Extract from the book "Guide to the Global Conspiracy" by David Icke

Bone Rotting, Brain-Dumbing Fluoride

Mobile phones are another form of excite toxicity and so is fluoride, the intellect suppressant added to Drinking Water Supplies and Toothpaste. Sodium fluoride is a common ingredient in Rat and Cockroach Poisons, Anaesthetics, Hypnotics, Psychiatric Drugs and Military Nerve Gas. It is one of the basic ingredients in the drug, Prozac, and the Sarin nerve gas used in the attack in the Japanese subway system in 1995.

Independent scientific evidence has said that fluoride causes various mental disturbances and makes people STUPID, DOCILE, and SUBSERVIENT. This is besides Shortening Life Spans and Damaging Bone Structure. The first use of fluoridated drinking water was in prison camps. This mass medication of water supplies with sodium fluoride was to sterilise the prisoners and force them into quiet submission. This plan was to control the population in any given area through mass medication of drinking water supplies. By this method they could control the population in whole areas, reduce population by water medication that would produce sterility in women, and so on. In this scheme of mass control, sodium fluoride occupied a prominent place.

Repeated doses of infinitesimal amounts of fluoride will in time REDUCE an individual's POWER TO RESIST DOMINATION, by slowly poisoning and 'narcotising' a certain area of the brain, thus making people submissive to the will of those who wish to govern them. He called it a 'convenient light lobotomy'.

The real reason behind water fluoridation is not to benefit children's teeth. The real purpose behind water fluoridation is to reduce the resistance of the masses to domination, control and loss of liberty. Any person who drinks artificially-fluorinated water for a period of one year or more will never again be the same person mentally or physically.

That is the very reason the Illuminati has been expanding the consumption of fluoride. What better way to suppress the minds of the population than through the public drinking water supplies, or the toothpaste they use every day? When we drink anything made from fluoridated water, including beer and soft drinks, we are being slowly and consistently drugged and the effects, both physical and mental, are cumulative. The more you drink, the more the stuff builds up in your system year after year.

Fluoride is a by-product of the aluminium industry and the manipulation to add it to public drinking water was engineered by the Reptilian hybrid Mellon family in the United States, which controls the aluminium cartel called ALCOA. The Mellons are close friends of the British Royal Family. Industrial fluorines are major polluters of rivers and streams, poisoning land, fish and animals. It was costing the aluminium industry a fortune to deal with them.

The Mellon family manipulated a situation in which this poisonous waste product became an enormous source of income and human control. In 1944, Oscar Ewing was employed by ALCOA at an annual salary of \$750,000. Imagine the equivalent figure today. Yet, within months, he left to become head of the US government's Federal Security Agency and began a campaign to add sodium fluoride to public drinking water on the false premise that it helps to stop tooth decay.

The Mellons now sell it for use in drinking water and toothpaste at a 20,000 per cent mark-up, but, as always, the main reason for fluoride is not money, it's control. A former mind controller told me of the Mellons' deep involvement with the Illuminati and Satanism. She said that to her knowledge the Mellon National Bank in Pittsburgh, Pennsylvania, is an Illuminati operation that launders money for them.

Would you trust such a family to put chemicals in drinking water and toothpaste because they want to keep your teeth healthy? Not that fluoride does. The cavity con Dr Hardy Limeback, head of the Department of Preventive Dentistry for the University of Toronto, and President of the Canadian Association for Dental Research, was once Canada's leading promoter of fluoride in water supplies. Then suddenly he announced he had changed his mind. He said: 'Children under three should never use fluoridated toothpaste or drink fluoridated water, and baby formula must never be made up using Toronto tap water — Never.'

A study at the University of Toronto revealed that people in cities which fluoridate their water have double the fluoride in their hip bones compared with non-fluoridated areas, and they discovered that fluoride was changing the 'basic architecture of human bones'. There is a debilitating condition called skeletal fluorosis caused by the accumulation of fluoride in the bones, making them weak and brittle.

The earliest symptoms are mottled and brittle teeth and Dr Limeback said that in Canada they were spending more money treating dental fluorosis than treating cavities. But hold on. At least putting this poison in the water and toothpaste is keeping teeth healthy and preventing cavities, yes? Er ... no.

As Limeback pointed out, they had been putting fluoride in the Toronto drinking water for more than forty years while Vancouver had never been fluoridated, but the population of Vancouver has lower cavity rates than Toronto. He said that cavity rates are low all across the industrialised world including Europe, which is still largely fluoride free. This was due, he said, to improved standards of living, less refined sugar, regular dental check-ups, flossing and frequent brushing.

There were now fewer than two cavities per child in Canada. He said that those who continue to promote fluoride are working with data that is fifty years old and questionable at best. 'The dentists have absolutely no training in toxicity', he said. 'Your well intentioned dentist is simply following fifty years of misinformation from public health and the dental association. Me, too. Unfortunately, we were wrong.' It's not only that we are drinking sodium fluoride, we are getting all the other crap from the aluminium industry, too.

Limeback said: ... certainly the crowning blow was the realization that we have been dumping contaminated fluoride into water reservoirs for half a century. The vast majority of all fluoride additives come from Tampa Bay, Florida, smokestack scrubbers. The additives are a toxic by-product of the super-phosphate fertilizer industry. Tragically, that means we're not just dumping toxic fluoride into our drinking water. We're also exposing innocent, unsuspecting people to deadly elements of lead, arsenic and radium, all of them carcinogenic.

Because of the cumulative properties of toxins, the detrimental effects on human health are catastrophic. In an address to students at the University of Toronto Department of Dentistry, Dr Limeback told them that he had unintentionally misled his colleagues and students. For the past fifteen years, he had refused to study the toxicology information that is readily available to anyone. 'Poisoning our children was the furthest thing from my mind,' he said. 'The truth was a bitter pill to swallow, but swallow it I did.'

Even though the biggest supporter of fluoride has now condemned its use, the Illuminati-controlled Canadian and American Dental Associations and public 'health' agencies, together with those in the UK and worldwide, continue to tell the people that fluoridation is good for them. European Union legislation on food supplements lists fluoride as an essential element to be offered to people. This is just one example of 'the bigger the lie, the more will believe it'. Reptilian hybrid placemen in the positions of medical administration and 'scientific research' tell the doctors and dentists what the 'truth' is and what they should believe. They, in turn, tell this to their patients and the media who simply take the official Access codes 539 Figure 247: The genetically-modified human line and repeat it like parrots.

Hardly anyone does any research of their own - dentists, doctors, 'journalists', or public - and so it becomes an accepted 'fact' that fluoride in drinking water and toothpaste is good for teeth and not harmful. That same scenario is repeated in relation to every subject and, as a result, the human population lives in its own little Fairyland.

This manufactured illusion is so entrenched in the human psyche that when the truth does come out, most people often laugh in its face.

Once again the pineal gland, vital to our 'out there' connection and so much more, is a target for fluoride. One study found that melatonin levels were lower in animals with high fluoride concentrations and it suggested a link between fluoride's affect on the pineal gland and the earlier onset of puberty. Certainly young girls in the United States are reaching puberty earlier and earlier. In November 2006, even the American Dental Association, which ludicrously and outrageously supports fluoride in water, issued an alert advising parents to avoid fluoridated water in food formula for infants. Yet, a product called 'Nursery Water', with added fluoride, continues to be sold for young children. '... When your child is drinking Nursery Water, you can be confident that your child is getting the right level of fluoride', says the sales pitch. No words suffice.
