

Find a Practitioner

thenaturalhealthlibrary.com/blog/general-natural-health-information/find-a-practitioner

Did you know that pharmaceutical companies fund medical schools and provide the curriculum? Did you know that conventional medical doctors receive less than a day on nutrition and even less on natural supplementation? Unless a medical provider takes extra time to seek out education on functional medicine and nutrition, most are clueless on how vital nutrition is for preventing and treating illness. They know about all the symptoms and what drugs to prescribe. Insurance fuels the fire and thus our pathetic state of health care.

Our best option? Find an experienced provider that will work one-on-one with you to help you heal your gut, detox your body, order functional labs and take the time to review them with you, then create a customized roadmap to help prevent or treat health issues. Here are some lists of resources to get you started on your search for a good health partner.
